Subject: RE: Recertification

Importance: High

Mr. Wray,

Thank you for your email request to renew a Certificate of Compliance for the 25-CB120 Wood Pellet Stove. To initiate a renewal request, you must apply for a renewal certification and submit the following documents:

1. A signed request from the manufacturer listing the model name(s), certification number, and a compliance statement. If no modification since the last EPA certification has been made, the manufacturer may request a potential waiver from certification testing. That is, you must affirm in your letter that no changes have been made to the stove that will cause wood heaters in the model line to exceed applicable emission limits. With that affirmation, you must state that England's is seeking a recertification waiver from the Agency.
2. Submit a copy of the EPA Certificate of Compliance letter (helps expedite the process)
3. Submit a summary of the test report (first 15 pages of the test report). This is optional but expedites the process.
4. A Certification of Conformity from the EPA-approved certifier (Required).

In your attached letter, you have indicated that the engineering diagrams you submitted to the Agency for certification had an error that Intertek is correcting. Therefore, England must submit a revised NCBI and CBI test reports. Both test reports must include a letter that explains the corrections made to the engineering diagrams and a statement that the corrections made to the drawings do not impact the particulate matter emission limits for which the EPA certified the model line. The letter must be signed by the EPA-approved test lab and the 3rd party certifier. Once EPA reviews the revised test reports, we will notify England's of the outcome.

Please note that your Certificate of Compliance expires on October 27, 2021. After such date, England's may not advertise for sale, offer for sale, or sell wood heaters listed under that certification without applying for and obtaining another Certificate of Compliance. If you have any questions, please let me know.

Subject: Recertification

Rafael,

This is a letter to have our 25-CB120 Pellet Stove Recertified, anyway you could give me a ballpark figure on when you can get this done?

I would have had this done sooner, but it was a mix up between Intertek and myself and now it only has 30 days until it runs out and I don't want that to happen

Thanks for your help!!

John Wray
